

The Currency Ag Strategic Hedging (CASH) Program

The *Currency Ag Strategic Hedging (CASH) Program* helps protect your farm revenues from a rising Canadian dollar and allows for the potential benefit of a falling C\$ on your physical commodity sales.

The Canadian dollar program captures returns by:

- Using a tested currency futures hedging system to protect against a strong C\$
- Proactively remaining unhedged when the C\$ weakens
- Incorporating option strategies for additional hedging gains

Connect with me to include the CASH Program as part of your overall farm revenue management strategy.
